

**(a)**

freestream inlet  
 $M_\infty = 8.03$

outlet

bow shock

slip wall

(b)

no-slip wall  
 $T_w = 294\text{ K}$

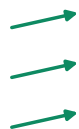

$R = 38\text{ mm}$

inlet split  
 $\phi = -12.25^\circ$

$\beta = 18.1^\circ$

150 mm

outlet

post-shock inlet  
 $M_2 = 5.25$

**(b)**

$M_\infty = 8.03$

10 mm

bow shock

upper triple point

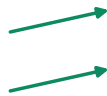

shear layers

jet bow shock

incident shock

transmitted shock

$M_2 = 5.25$

lower triple point

supersonic jet
